

PRIME WHITE STALLIONS

WE ARE UNLOCKING THE HEALTH CARE VALUE CHAIN FOR THE ECONOMIC COMMUNITY OF WEST AFRICAN STATES (ECOWAS).

VISION:

We aim to unlock investment in the healthcare value chain for the Economic Community of West African States (**ECOWAS**) to achieve universal health coverage.

MISSION:

We utilise our donor funds to attract private capital for investment in companies within the West African healthcare value chain.

HOW PARTICIPANTS BLEND FOR UNIVERSAL HEALTH COVERAGE.

1. PWS Donors:

Our donors help attract private capital to the **ECOWAS** region. Through our collaboration with supply chain traceability systems, each country can maintain authentic data on drug supply across the universal health coverage framework.

2. Capital Providers:

We collaborate with capital providers to secure investment funds for manufacturers that come to West Africa. Our donor funds serve as a key incentive for private capital providers.

3. Manufacturers:

Our primary focus is pharmaceutical manufacturers making foreign direct investments in the region. Additionally, we connect these manufacturers with capital providers who have pledged funding through our initiative, which utilises a blended finance structure.

4. National Governments:

We assist manufacturers in securing framed contracts and volume guarantees that align with national universal health coverage policies. This ensures that enrollees in the National Health Insurance Scheme can access products from these manufacturers.

ABOUT US.

Prime White Stallions is dedicated to strengthening the Economic Community of West African States (ECOWAS) by lowering the risk for **investors** in the health care value chain for the region. Manufacturers coming into this region can get better conditions for raising capital and get incentives through the National policy frameworks for Universal Health Coverage.
